

## RND-WPT34

RND Wall Power Station with 3 AC Plugs  
and 4 USB ports (4.8 amps)

Ⓐ USB Ports feature a total of 4.8 amps, please check the amperage needed for your device. The USB ports work best when the devices being charged do not exceed the 4.8 amps. For example the USB ports can normally charge 3-4 smartphones, or 2 tablet at a time for the quickest charge speeds.

Ⓑ Pull the slide out holder forward to open it , this provides a convenient place to store your phone while charging.

Ⓒ You can also use the shelf on the top of the wall charger to store another phone.

Ⓓ This light indicates that the surge protection is working.

Ⓔ Attach your wall charger securely to the wall with this screw, or remove the screw and use the wall charger without attaching.

Ⓕ The plastic prong on the back fits into the top plug of the wall outlet for added support.
