

RND-SPS-DUAL-PHONE

RND Wall Power Station includes 3 AC Plugs, 2 USB ports, and 2 slide out holders.

- A. USB ports feature 2.1 amps total, please check the amperage needed for your device. The USB ports work best when the devices being charged do not exceed the 2.1 amps. For example the USB ports can normally charge 1-2 smartphones, or 1 tablet at a time for the quickest charge speeds.
- B. Pull the slide out holders down to rotate them open from a closed position.
- C. The slide out holders actually pull open to the side to provide more

- D. This light indicates that the surge protection is working.
- E. Attach your wall charger securely to the wall with this screw, or remove the screw and use the wall charger without attaching.

Note: The plastic prong on the back fits into the bottom plug of the wall outlet for added support.
